Ref.: Advanced School on Axonal Transport, January 13-26, 2013

To Whom it May Concern,

The Advanced School on Axonal Transport commenced on January 13 at the campus of IIT and continued for ~2weeks. With ~40 students in attendance, the professors presented lectures on axonal transport and related topics in he mornings, then led tutorials, discussions, and workshops in the afternoons.

My role was professor. I arrived midnight of January 12, presented lectures on January 14, 16, and 21. I also led a tutorial on Critical Analysis of Scientific Literature on the afternoon of January 14, and had extensive discussions with other participants throughout the period of the school.

The overall organization of the school was excellent. I can not think of ways to improve the proceedings.

Sincerely,

William Saxton, Ph.D.  
Professor, Dept. of MCD Biology  
University of California  
1156 High Street  
Santa Cruz, CA 95064
