

ICTS Astrophysics and Relativity Seminar

- Title** : The sound of black holes
- Speaker** : Vitor Cardoso (Niels Bohr Institute, Denmark)
- Date** : Thursday, 03 April 2025
- Time** : 3:30 PM (IST)
- Abstract** : One of the most remarkable possibilities of General Relativity concerns gravitational collapse to black holes. Is the strong field dynamical regime of gravity well described by General Relativity? I will summarize the status of black hole spectroscopy and attempts at probing near horizon physics.
- Venue** : Feynman Lecture Hall
