

ICTS-RRI MATHS CIRCLE
July 11, 2026

Before we meet, spend a little time with the following:

Watch Nick Sousanis' talk *Unflattening: Revolutionizing Thought in Comics*.

If you have access to *Unflattening* or to *Flatland*, spend some time with them as well.

Notice what stays with you.

Look at some of Anatoly Fomenko's *Mathematical Impressions*.

Choose one.

Live with it for a few days.

Respond to it. It could be a sketch, a poem, a conjecture, a dance, origami, a diagram, a photograph, a koan, a question, two lines...

Think of a piece of mathematics that has stayed with you.

Respond to it.
